→ focus on code not, how the result is looking

Day 10, 10 June, 2021

Properties of CSS

background	right
border	bottom
padding	left
Margin	position
Display	
flex	etc
transition	float
transform	clear
z - index	
top	

html color coder (use)

① background:-

body {
    background-color : green;
    background-image : url(" ___ ");
    background-repeat : no-repeat;
    background-size : cover;

    background-position : center;

    background-attachment : fixed.

This will auto matically Repeat if the content is more.

without repeating, the img will adjust itself and cover the total page.

Center part of the image will be shown.

background will be fixed, only the content will move.

Doubt:-

difference between.

* {
    →
    y

body {
    →
    y

Commenting in CSS.

1. Single line :- //

2. Multi line : /* */

---

2. #p {

pup

    Color : green;
    width : 190px;
    height : 110px
    border : 1px solid green;
    background : black;
    overflow : hidden;

}

doubt :-

Note :-

① In css, while writing the class Name.
for eg top heading, you should write
（top-heading）

② Every extra character you use, will (eg space also).
consume some space while getting transferd
from server to your clients computer.

③ className for para you can use
instead, discription or dsc
and for side heading (className) you
can use topic

⇒ topic & description.

④ focus on code and use comments

⑤ (Entrepreneur Mindset ⌐→ don't give up.
   └→ failed
   (dont write fresher in the resume

gap :
